BREAKWATER

eDiscovery Manager

Reduce the cost of electronically stored information

eDiscovery Manager enables authorized IT and legal staff to search, cull, hold and export case-relevant content reducing management costs for electronically stored information (ESI). This comprehensive solution gives you the high performance and rich functionality you need to support complex cases throughout your enterprise.

Benefits

Reduces discovery costs

Streamlines and standardizes the electronic discovery process. eDiscovery Manager helps you respond to discovery requests cost-effectively and with agility.

Preserves ESI

Preserves your ESI evidence in a security-rich, auditable, high-scale, trusted evidence repository that includes chain-of-custody tracking.

Organizes ESI, email, and other content

Improves your ability to organize ESI, email, and other content to reduce discovery costs and risks.

Highlights

- Optimized for high volume unstructured data collection
- Provides chain of custody and audit reporting
- Permits scheduling searches to allow ongoing automated collection and holds
- Exports case relevant ESI, in native or Electronic Discovery Reference Model (EDRM) XML formats

Key Features

Lower eDiscovery costs

Use an intuitive web-based interface to quickly access and gain early insight into case-related content. Improve proactive formulation of discovery strategies. Create new cases and work on existing cases. Save searches to share with other authorized users and schedule searches for increased productivity. Help your legal staff manage complex cases while preserving the chain of custody for documents in individual case repositories.

Preserve your ESI evidence

Provide a change-tracking repository, demonstrate authenticity, and address complex chain-of-custody requirements. Maintain a robust audit trail that can be exported quickly and used in court to defend ESI evidence. Leverage wide-ranging robust security controls enabled by dynamic role-based features. Supply granular control of legal case tasks. Use an automated hold capability to preserve ESI. Reduce your exposure to ESI spoliation, accidental modification, and deletion of evidence.

Use powerful search for quick content access

Use the eDiscovery Manager high-volume search capabilities and empower your IT and legal staff to sift through millions of pieces of content smartly, including email and other documents. Automatically select the most relevant ESI set for a particular case.

Organize ESI, email, and other content

Address underlying discovery issues in increasing volumes of uncontrolled ESI. Support a scalable enterprise content management platform that delivers integrated content collection, classification, records management, content analytics, and discovery process automation. Keep your ESI volume under control while delivering agile, defensible litigation responses.

About Breakwater

Breakwater helps mitigate risk and gain insight from sprawling information by combining technology automation and human expertise. Our expert consulting, software, and managed services address the challenges within information governance, disputes and investigations, regulatory compliance, privacy, and cybersecurity. Our solutions allow governance, legal, and risk professionals to locate, access, analyze, and manage information by making data transparent and actionable. Breakwater helps clients in public and private sectors mitigate risk, improve productivity, and increase profitability by transforming how they use data.
